**Re: Oral Ex Parte Presentation  
CC Docket No. 94-102**

Dear Ms. Dortch:

On behalf of my client QUALCOMM Incorporated ("QUALCOMM"), this is to report that on April 23, 2002, Jonas Neihardt, Vice President, Federal Affairs of QUALCOMM, and I met with Paul Margie, Legal Advisor to Commissioner Michael Copps regarding the above-referenced docket.

In this meeting, we discussed with Mr. Margie the current status of the deployments of QUALCOMM's assisted GPS position location technology (known as gpsOne), including the progress made by Sprint PCS and Verizon Wireless here in the United States in deploying this technology to provide Phase II E911 service. We also showed Mr. Margie a number of wireless phone models, including a model which Sprint PCS and Verizon Wireless are now selling, all of which contain QUALCOMM chips incorporating gpsOne. In particular, we noted the tremendous commitment made by Sprint PCS and Verizon Wireless, in terms of both devoting considerable human resources and making major expenditures, to overcome a number of operational issues in a tight time frame to deploy this highly accurate E911 technology. We expressed our concern that other carriers do not appear to be acting with similar commitment.

Sincerely yours,

/s/ Dean R. Brenner

Dean R. Brenner  
Attorney for QUALCOMM Incorporated
